Model	Nominal Input voltage (Vac)	Output voltage (Vdc)	Output current (A)	Efficiency Typ.	Ripple (Typ.)	Certificate
RIRA30-5	100-240	5	5	78%	32mV	CE, FCC, CB, UL, CUL
RIRA30-12		12	2.5	83%	42mV	CE, FCC, CB, UL, CUL
RIRA30-24		24	1.3	87%	46mV	CE, FCC, CB, UL, CUL

1. The ripple values are measured at 20MHz of bandwidth by using a 12" twisted pair-wire termin-ated with 0.1uF & 47uF parallel capacitor under ambient temperature 25° C at rated input voltage and rated load;
2. The efficiency values are measured under ambient temperature 25° C at rated input voltage and rat-ed load.

ELECTRICAL - Input

Input voltage		90		264	Vac
Input frequency		47		63	Hz
Input current	Full load, Vin = 115Vac Full load, Vin=230Vac		0.65 0.35		A
Inrush current	Cold start, Vin = 115Vac Cold start, Vin=230Vac		30 60		A
1.This product is built in inrush limiting circuit to protect the circuit from surge current damages when the power is turned on. Malfunction can occur by repeating the input voltage on and off rapidly. Therefore, sufficient interval should be given between turning on and off the power; 2.To avoid connecting the switch or fuse to input terminal(outside of the power supply), more consideration should be given when selecting the parts that can endure the inrush current					
Stand-by power consumption	Vin=230Vac		1		W
Surge voltage	L-N		2		KV

<b>ELECTRICAL - Output</b>			
PARAMETER	CONDITIONS	MIN TYP MAX	UNITS
Output voltage accuracy		±1	%
	RIRA30-5	4.5 - 5.3	V
	RIRA30-12	11.6 - 12.3	V
	RIRA30-24	23.5 - 24.5	
Output voltage adjustment range	Output voltage can be adjusted within above range by V-ADJ. variable resistance inside of the power supply. When output voltage exceeds the range, the power supply will be in failure or get into over voltage protection mode. To avoid the case that the output voltage is higher than rated voltage, output current should be used under rated current		
Minimum load		0	A
Line regulation	Vin from 100Vac to 240Vac	1	%
Load regulation	Vout from min. to max.	1	%
Turn-on delay time	Full load, Vin=115Vac	100	ms
Hold up time	Full load, Vin=115Vac	20	ms

<b>PROTECTION</b>

Over voltage	RIRA30-5: over voltage protection value 6.5V RIRA30-12: over voltage protection value 16V RIRA30-24: over voltage protection value 30V  (1)When output voltage exceeds above over voltage protection value or reversal voltage occurs, the protection will be started and the output voltage will be cut off in order to protect the power supply; (2)The power supply will recover after the power is turned on again
Over current	RIRA30-5: over current protection value 6A RIRA30-12: over current protection value 4A RIRA30-24: over current protection value 2.2A  (1) When output voltage exceeds above over current protection value, the protection will be started and the output voltage will be cut off in order to protect the power supply; (2) The power supply will recover automatically after the fault condition is removed
Over temperature	Over temperature protection value: 100±10°C  (1)When the ambient temperature exceeds above over temperature protection value, the protection will be started and the output voltage will be cut off in order to protect the power supply; (2)The power supply will recover after the power is turned on again
